Politecnico di Torino - HCI Course (02JSKOV)

Assignment 5 - Usability Testing

Study Title: DrawTogether - Usability Test for a Drawing Companion App

Researchers (MODY AI Group):

- Zuhail Didem Aytac
- Mehmed Yusa Erguven
- Ozgun Kocak
- Mohammedreza Babaei

Purpose

We are conducting a usability test to evaluate an interactive high-fidelity prototype of DrawTogether, a mobile application designed to support beginner and hobbyist artists in uploading drawings, finding inspiration, and tracking progress.

The collected data will be used only for an academic project in the Human-Computer Interaction course at Politecnico di Torino.

Your participation is voluntary. You may:

- stop the test at any time,
- skip any question,
- refuse to be photographed.

Procedure

During the session, you will be asked to complete three short tasks using the prototype.

A facilitator will guide the session, while other team members may observe and take notes.

The session is expected to last approximately 20–30 minutes.

We will collect written notes about your actions and comments, task outcomes (success/failure), approximate task completion times. With your permission, we may take a few photos during the session. These photos will be used only as supporting material in the final report for this course.

Confidentiality

Your identity will remain anonymous in all reports and presentations. We will refer to you only using a participant code (e.g., P1, beginner artist). All collected data will be used only within the context of this course.

I understand that my usability test session will be recorded. I grant Mody AI permission to use this recording for internal use only, for the purpose of improving the designs being tested.

- ☐ I agree to participate in this usability test.
- ☐ I agree to have anonymized notes and results used in the final course report.
- ☐ I agree to be photographed during the session (optional).
